- Authentication & authorization concepts
- Deployment basics (shared hosting / local servers)

WORK EXPERIENCE

May 2025 - June 2025

FeelTech Solutions

Web Developer Intern

- Built a modern **Urban Service Provider** website (inspired by Urban Company) using React.js. Developed reusable components, integrated routing, animations, and responsive design. Gained hands-on experience with React Hooks, Context API, and modular architecture.

Aug 2023 - Aug 2023

Internship Project

- Developed a fully functional hostel website to manage facilities, activities, and admission processes
- Implemented user-friendly UI and responsive design

Sep 2022 - Sep 2022

Infonaya Software

Wordpress Developer Intern

- Gained practical experience in WordPress development, including theme customization, plugin integration, and basic SEO practices. Worked on improving site performance and UI responsiveness.

PROJECTS

DayFlow - Human Resource Management Platform

- An online store with cart, checkout, and order tracking features. Users can browse, purchase, and view orders in real-time.

Textile Business Management System

- A MERN stack web application for textile businesses that manages products, parties (customers/suppliers), invoicing, and payment tracking with secure authentication and visual analytics dashboards.

Urban Service Provider

- A modern website inspired by Urban Company built using React.js. Includes service listings, animated UI, cart functionality, routing, and responsive layouts using React Hooks and Context API.
