PROFILE

Full Stack Developer and final-year Computer Science student with hands-on experience building end-to-end web applications using React.js, Next.js, Node.js, and PostgreSQL. Skilled in REST API design, authentication flows, and responsive interface development. Focused on writing clean, modular code and building practical software solutions.

EDUCATION

Charusat University

B.Tech – Computer Science & Engineering | CGPA: **8.03**

Anand, Gujarat

2024 – 2027

BBIT – GTU

Diploma – Computer Engineering | CGPA: **8.54**

Gujarat

2021 – 2024

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java, C++, PHP

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive UI Development

Backend: Node.js, Express.js, REST API Design, Authentication & Authorization (JWT)

Databases: PostgreSQL, MySQL, MongoDB, Firebase, Prisma ORM

Tools & Tech: Git, GitHub, API Integration, Vercel, Deployment & Hosting

WORK EXPERIENCE

Web Developer Intern

May 2025 – June 2025

FeelTech Solutions

Ahmedabad, Gujarat

- Engineered a **5-screen Urban Service Provider** platform in React.js, building **15+ reusable components** with React Hooks, Context API, and modular architecture.
- Delivered fully responsive UI across **3 breakpoints** including mobile, tablet, and desktop with routing, animations, and optimized page layouts.

Hostel Management Website

Aug 2023

Academic Project

Gujarat

- Developed a responsive hostel management website covering facilities, activities, admission information, and student-oriented content with a clean multi-section layout.

WordPress Developer Intern

Sep 2022

Infonaya Software

Anand, Gujarat

- Customized WordPress themes, integrated plugins, and applied SEO best practices to improve UI responsiveness and usability for a client-facing web property.

PROJECTS

DayFlow – HR Management Platform | React.js, Node.js, PostgreSQL, Prisma, REST APIs

- Architected a **2-role** admin/employee HR system **solo**, handling **100+ employee records** with real-time attendance tracking and workflow operations.
- Built **8+ REST API endpoints** with JWT-based authentication integrated into a structured dashboard-driven interface.

LogiSense AI – Logistics Intelligence System | React.js, Node.js, REST APIs, AI Integration

- Engineered a **3-agent** AI logistics platform **solo** with real-time simulation and multi-agent decision-making; exposed **8+ API endpoints** for disruption handling and routing optimisation.
- Delivered a live operational dashboard with **5 data visualisations** for real-time routing and risk-aware insights.

SmartVenue – Venue Intelligence Platform | React.js, Node.js, REST APIs, Real-Time Analytics

- Designed a **3-engine** AI platform with **sub-5-second** real-time crowd prediction, queue optimisation, and smart routing recommendations.
- Built **8+ backend API endpoints** and a **5-widget** live analytics dashboard surfacing actionable insights through API-based data flow.
